DSA

MASTER CRAFTED DOORS

VS

OTHER WOOD DOORS

DSA'S 30+ CLASSIC DOOR COLLECTIONS

DSA'S WYNSTELLAR COLLECTION

OTHER WOOD DOORS

PREMIUM WOOD QUALITY

Constructed with premium Meranti Mahogany

Color matched wood with excellent stain absorption

Hardwood core densities of 500 - 650kg/m³

Constructed with our proprietary modified Accoya

Paints efficiently with long-lasting coverage

Constructed using mixed timber species & Mahogany substitutes

Blotching caused by uneven paint and stain absorption

Core densities +/- 350kg/m³ cause limited durability

SUPERIOR DOOR CONSTRUCTION

Anti-splitting construction tested to increase durability with 11-ply floating panel core and finger joint laminated rails

Vertically grained panels utilized on each component for an elegant, high-end aesthetic

Same wood specie throughout door for increased dimensional stability and performance

Standard sandwich panel construction

Horizontally and mixed grained panels

Mixed wood species of softwood and hardwood throughout door

ECO-FRIENDLY & ENERGY EFFICIENT

Constructed with highly-sustainable timber exclusively from our partner company's forest concession

Features standard and custom doors with our patented energy-efficient CLPF construction and Low E glass

Locally manufactured in our solar-powered production facility in Raleigh, North Carolina

Constructed with timber from third party sources

Cheaper construction and reduced thermal efficiency

Manufactured overseas and shipped to retailer

WORK WITH INDUSTRY EXPERTS

Ability to customize every door to your exact specifications and preferences with our Custom Design Specialists

Innovative new products and improvements developed year-round by our Research & Development team

Dedicated inside and outside sales representatives for every dealer to answer questions and provide assistance

High fees and long lead times for limited custom offerings

Slow to innovate and update offerings

Limited support strains order accuracy & customer satisfaction
